RE: McCall Oil – OSRO Coverage

RESPONSE CONTRACTOR CERTIFICATION

This letter confirms that National Response Corporation (NRC) has a Facility Standby Services Agreement, 4259, with McCall Oil. This Agreement provides OSRO services for McCall Oil's facility located in Portland, OR. NRC confirms that McCall Oil is authorized to reference NRC resources and certifications in its state and/or federal contingency and response planning documents pursuant to terms of the Agreement.

NRC is a Primary Response Contractor (PRC) in Washington and Oregon, and has been rated by the U.S. Coast Guard as an OSRO meeting all classification ratings for Rivers/Canals, Inland/Nearshore and Oceans environments, as well as providing Shoreline response capabilities. NRC is capable of beginning mobilization of response efforts within one hour of a spill notification.

If you have any questions, or if I can be of further assistance, please don't hesitate to contact me either by phone at 206-546-7162 or by e-mail at sbarton@nrccs.com.

Sincerely,

A handwritten signature in cursive script that reads "Stephanie Barton".

Stephanie Barton
Director, Emergency Response Programs

PREP Credit Report

Dear Client:

Please find attached the - ***NRC 2008 Annual Preparedness for Response Exercise Program (PREP) Equipment Deployment Summary Report*** (Attachment A) for review and retention with an accompanying Letter of Attestation (Attachment B). This report documents OSRO equipment deployment exercise information in compliance with the National Preparedness for Response Exercise Program (PREP) Guidelines for reportable and evaluated on-water equipment deployments during exercises, training and actual spill responses. It provides information necessary for your OSRO equipment deployment credit for the 2008 calendar year.

This report documents deployment of the various types of skimming systems and boom that NRC owns or controls for classification purposes. It includes equipment aboard our Oil Spill Response Vessels (OSRVs) and at Independent Contractor Network (ICN) facilities dispersed throughout the various Captain of the Port/Marine Safety Office (COTP/MSO) areas. The information categories include:

ICN/OSRV - Each response facility and OSRV that comprise the NRC's response network. We also indicate the USCG OSRO classification ID next to their names.

LOCATION - The geographical location (city/state) of the ICN facility or vessel home port.

COTP-MSO REGION - The COTP-MSO or EPA Region in which the response equipment and facility personnel are based.

SKIMMING EQUIPMENT - Each type of skimmer in the NRC owned or controlled equipment inventory. A numeric figure in the columns for each type of skimmer indicates the number of times that personnel at a particular facility or OSRV have activated and deployed this type of skimming system in the water.

BOOM EQUIPMENT - The type and amount of boom deployed by personnel assigned to a particular facility and vessel.

Each Independent Contractor Network (ICN) Participant facility and OSRV, of which there are over one hundred, has an active file that feeds data to the Summary Report. In 2008, the following environmental service companies joined or left the ICN, or experienced a company name change as noted (updated accordingly):

<u>Company Name</u>	<u>Status</u>
Allied Marine Service	Deleted
Central States Environmental Services	Deleted
Chitolie Trucking Service	Deleted
Envirosafe is now Triumvirate Environmental	Change
Coteau Environmetal	Joined
Earth Movers Inc.	Joined
Haz-Mat Response Inc.	Joined
Hulcher Services Inc.	Joined
Sunpro Services	Joined
Swat Consulting	Joined

ICN facility equipment deployment records are held at each facility and at NRC Headquarters in Great River, NY. OSRV equipment deployment records are maintained on board the vessels and both at NRC Headquarters and in the NRC Houston Marine Department office. These internal historical records identify each equipment deployment occurrence by:

- NRC Control No.
- Date of deployment
- Event description - actual spill incident, equipment training or exercise
- Type of environment - sheltered , protected or unsheltered
- Type of skimming system deployed
- Type and quantity of boom deployed

If you have any questions regarding this report, contact Ray McCoy at 631-224-9141. Please ensure individuals responsible for the PREP program in your organization receive this report. If you would like additional copies they are located on our Web site, which is www.nrcc.com under the client access portion. Widest dissemination of this document is encouraged.

Sincerely,

Steven A. Candito
President

a SEACOR company

ATTESTATION

I, Steven A. Candito, President of National Response Corporation (NRC), an Oil Spill Removal Organization (OSRO) with full OSRO classifications in all Captain of the Port Zones, for all operating environments within our Area of Service do hereby attest, based upon the information provided to me by the members of the NRC Independent Contractor Network, each of whom are responsible for similar attestations to their own clients under the National Preparedness for Response Exercise Program and based on my own personal knowledge, that boom and skimming systems, more than adequate to satisfy the OSRO field equipment deployment drill requirements of OPA '90 have been deployed on your behalf in the United States East Coast, Gulf Coast, West Coast, Inland River and Caribbean Regions within the most recent calendar year. Further that NRC-owned equipment is inspected and maintained under a formal preventive maintenance program. Personnel training requirements are met through a formal equipment deployment-training program. The personnel who deployed the equipment demonstrated their ability to successfully deploy and operate the equipment and the equipment was in good working order. Further, records of these deployments are maintained at our headquarters in Great River, New York, USA.

Date: 1 February 2009

A handwritten signature in black ink, appearing to read "St Candito", written over a horizontal line.

Re: Standby Services Agreement
4259

Dear ~~Geary Powell~~, *Edgar S. (Ted) McCall*

NRC Environmental Services Inc. ("NRCES") has received a Request for Information from the U.S. Environmental Protection Agency, Region 10 ("EPA"), pursuant to section 104(e) of the Comprehensive Environmental Response, Compensation and Liability Act (hereafter referred to as the "104(e) Request") related to the Portland Harbor Superfund Site in Portland, Oregon. NRCES is compelled under penalty of law to produce documentation responsive to the 104(e) Request. NRCES' response to the 104(e) Request is due September 12, 2008.

NRCES has determined that it must disclose to the EPA some project information related to operations that NRCES performed for the addressee of this letter ("Company") within the Portland Harbor Investigation Area, as defined in the 104(e) Request. NRCES' obligation to produce such Company information exists regardless of any claim of confidentiality. However, the 104(e) Request instructions allow NRCES to assert a business confidentiality claim covering information pursuant to 42 U.S.C. §§9604(e)(7)(E) and (F), and 40 C.F.R. § 2.203(b). All information claimed to be confidential must be identified as "trade secret", "proprietary" or "company confidential". A confidentiality claim must be supported by the submission of information consistent with 40 C.F.R. Part 2. Information covered by a confidentiality claim will be disclosed by EPA only to the extent, and only by means of the procedures provided in 40 C.F.R. §§ 2.201-2.311. Otherwise, all information received by EPA may be made available to the public without further notice.

NRCES plans to submit a business confidentiality claim to the EPA for all project files that are produced that contain financial information. However, if EPA initiates a determination of whether the business information is entitled to confidential treatment for reasons of business confidentiality, Company will need to provide the basis for the claim of business confidentiality under 40 C.F.R. Part 2.

If you would like further information about Company project documentation that NRCES has determined it must disclose to EPA, please contact the undersigned at 503-978-7289.

By this letter, NRCES is notifying Company if NRCES' legal obligation to disclose to EPA certain Company information in its possession. Further, NRCES needs to understand Company's position on this disclosure and whether Company will participate in efforts to keep Company information confidential. Please select one of the options below, execute and return this letter to the undersigned's attention no later than September 1, 2008. A response by Company in an electronic format (facsimile or e-mail) shall be deemed to meet the obligation for formal written notice. If you fail to respond to this letter, NRCES will consider your lack of response as consent to NRCES on behalf of the Company to disclose Company information to the EPA without a claim of confidentiality.

Thank you,

Polly Hyke
Polly Hyke

☐ On behalf of the Company designated below, I consent to the disclosure of Company information by NRC Environmental Services Inc. to EPA in response to EPA's 104(e) Request without restriction.

Company Name: McCall Oil + Chemical Corporation
By: Edgar S. McCall
Title: V.P.
Date: 9/18/08

☐ On behalf of the Company designated below, I consent to the disclosure of Company information by NRC Environmental Services Inc. to EPA in response to EPA's 104(e) Request under a claim of business confidentiality. The Company will provide supporting documentation required to support a confidentiality determination in accordance with 40 CFR Part 2 as requested. If such information is not provided when requested, Company shall waive its claim of business confidentiality and agrees to the unrestricted disclosure of responsive Company information to EPA.

RE: McCall Oil - OSRO Coverage

RESPONSE CONTRACTOR CERTIFICATION

This letter confirms that National Response Corporation (NRC) has a Facility Standby Services Agreement, 4259, with McCall Oil. This Agreement provides OSRO services for McCall Oil's facility located in Portland, OR. NRC confirms that McCall Oil is authorized to reference NRC resources and certifications in its state and/or federal contingency and response planning documents pursuant to terms of the Agreement.

NRC is a Primary Response Contractor (PRC) in Washington and Oregon, and has been rated by the U.S. Coast Guard as an OSRO meeting all classification ratings for Rivers/Canals, Inland/Nearshore and Oceans environments, as well as providing Shoreline response capabilities. NRC is capable of beginning mobilization of response efforts within one hour of a spill notification.

If you have any questions, or if I can be of further assistance, please don't hesitate to contact me either by phone at 206-546-7162 or by e-mail at sbarton@nrccs.com.

Sincerely,

A handwritten signature in cursive script that reads "Stephanie Barton".
